ABBREVIATIONS, ACRONYMS AND DEFINITIONS

COGTA – Department of Co-operative Governance and Traditional Affairs

CPI – Consumer Price Index

DORA – Division of Revenue Act

EPWP – Expanded Public Works Programmes

GDP - Gross Domestic Product

GRAP – Generally Recognised Accounting Practices

IDP – Integrated Development Plan.

INEPG – Integrated National Electrification Program Grant

MFMA – Municipal Finance Management Act, 56 of 2003

MIG – Municipal Infrastructure Grant

MPRA – Municipal Property Rates Act, 06 of 2004

MSA – Municipal Systems Act, 32 of 2000

MDTG – Municipal Demarcation Transition Grant

MTREF – Medium-term Revenue and Expenditure Framework

WSIG – Water Services Infrastructure Grant

MWIG – Municipal Water Infrastructure Grant

NDPG – Neighbourhood Development Program Grant

NERSA – National Electricity Regulator of South Africa

NT – National Treasury

PT – Provincial Treasury

PTISG – Public Transport Infrastructure Systems Grant

SDBIP – Service Delivery and Budget Implementation Plan

The Act – Refers to the Municipal Finance Management Act, 56 of 2003

Adjustment Budgets – Prescribed in section 28 of the Municipal Finance Management Act. It is the formal means by which a municipality may revise its budget during a financial year.

Equitable Share – A general grant paid to municipalities.

Operational Expenditure – Spending on the day to day expenses of the municipality such as general expenses, salaries and wages, and repairs and maintenance.

Rates – Local Government tax based on assessed valuation of a property.

Allocations – Money received from Provincial and National Treasury.

Budget – The financial plan of the municipality for a specific period.

Capital Expenditure – Spending on municipal assets such as property, plant and equipment's. Any capital expenditure must be reflected as an asset on a municipality's balance sheet.

1.1 MAYOR'S FOREWORD

It is an honour to present the IDP and Budget 2018/19 to the community of Thaba Chweu Local Municipality. This year marks a year of Dr. Nelson Mandela and Mrs. Albertina Sizulu in which as Council of Thaba Chweu Local Municipality we have to put efforts and means to ensure that all the commitments we have made to our communities are met in honour of the great Heroes and heroines of our country.

Our municipalities are located at a local sphere of government which is the coalface of service delivery of government. Municipalities should interact with communities on a daily basis being mandated by the constitution of the Republic of South Africa, Act 108 of 1996 in order to create a better life for all and enhance the living conditions of the community and its members. Indeed, it is true that Thaba Chweu Municipality continues to work together with our communities in order to find sustainable and progressive way to fulfil their social, economic and developmental needs.

It is through Integrated Development Plan, which is the most important tool that we use to guide our planning, development and decision making processes in our municipality. All other plans and actions of the municipality are resonant with and secondary to the IDP. In order to achieve the vision and mission of our municipality, we commit ourselves in engaging our local communities through public participation in finding best solutions to address the long term objectives of the municipality. Our IDP places our institution at the vantage point of future development.

The council was elected in 2016 and has embarked on a process of formulating and reviewing its five year integrated development plan (IDP) 2016 -2021 on annual basis. The IDP implementation has encountered numerous challenges in which funding was at the centre from the beginning, this gave the municipality a tough challenge in executing its IDP mandate this was clearly visible in areas like Sabie, Lydenburg, Graskop and most of the rural and farm areas.

However it is also important to note that our Eskom debt has had negative impact on balancing the budget to service Eskom account and funding the IDP projects.

In terms of financial efficiency we have focused on establishing cost effective measures to reduce our spending during these trying times whilst ensuring that what we spend is on key priority basic services in order to improve the state of our local economy for an improved socio-economic levels. Working with business and other government institutions we will make an impact, I am confident that we will be able to accelerate service delivery, and ensure that we create a today that is better than yesterday and a tomorrow that is better than today.

Cllr S Mashigo-Sekgobela

Executive Mayor

1.2 COUNCIL RESOLUTIONS

On 30 May 2018, under item A 32/2018 the council of Thaba Chweu Local Municipality met at the council chambers to consider the 2018/2019 – 2020/2021 annual budget and medium-term revenue and expenditure framework report tabled by the executive Mayor and resolved that;

(a) Council take cognizance of the contents of the report;

(b) The annual budget and medium term revenue and expenditure framework (MTREF) consisting of an operating and capital budget for 2018/2019 – 2020/2021 financial years, as reflected in the below be adopted;

1.3 Legislative Framework

In terms of Chapter 4 Municipal Budgets, section 16 of the Municipal Finance Management Act No. 56 of 2003,

(1) The council of a municipality must for each financial year approve an annual budget for the municipality before the start of that financial year.

(2) In order for a municipality to comply with subsection (1), the mayor of the municipality must table the annual budget at a council meeting at least 90 days before the start of the budget year.

Section 18(1) (a) states that an annual budget may only be funded from realistically anticipated revenues to be collected and,

Section 23 (1) states that when the annual budget has been tabled, the municipal council must consider views of-

(a) the local community,

(b) the national treasury, the provincial treasury and any provincial or national organ of state or municipalities which made submissions on the budget.

It is of the out most importance that TCLM council consider the annual budget for the purposes of public consultations.

1.4 Executive Summary

The key service delivery priorities, as reflected in the IDP, informed the development of the Budget, including the need to maintain the Municipality's financial sustainability.

Revenue collection strategies are required to improve the collection of outstanding consumer debt are being implemented by the Municipality, such as the debt relief programme and securing external capacity to deal with revenue enhancement and the improvement of debt recovery. The municipality appointed a service provider in order to deal with Electricity Cut-off in respect to enhance the municipal revenue and it is hoped that there will be positive results thereof.

Cost containment measures are also being implemented considering the Strategic Planning Resolutions to curb costs and to improve operational efficiency.

All National Treasury's MFMA Circulars were used to guide the compilation of the 2018/19 -2020/21 MTREF, including the latest MFMA Budget Circulars, as well the plans and recommendations of the political leadership.

The Municipality faced the following significant challenges during the compilation of the 2018/19 MTREF:

- Budgeting for a surplus (i.e. Total Revenue not exceeding Total Expenditure) on the Operating Budget;
- Fully implementing cost containment measures and eliminating non-core expenditure items;
- Maintaining revenue collection rates at acceptable levels and even more;
- Ensuring that electricity and water losses are maintained at an acceptable levels;
- Allocation of the required operating budget provision for newly created infrastructure and facilities, with a consequential impact on the level of rates and tariff increases;
- Allocation of the required budget provision for the rehabilitation and maintenance of existing infrastructure;
- Allocation of the required operating budget provision for staffing requirements, including the existing staff and planned appointments for 2018/19;
- Depleted Capital Replacement Reserve, impacting on the Municipality's ability to fund capital expenditure from internal sources such as purchases of the Yellow Fleet and Refurbishment of internal street of Lydenburg, Graskop and Sabie;
- Maintaining an acceptable cost coverage ratio;
- Reprioritisation of capital projects and operating expenditure within the financial affordability limits of the Budget, taking the municipality's declining cash position into account;

In preparing the Medium Term Revenue and Expenditure Framework 2018/19-2020/21, Thaba Chweu Municipality considered a number of factors that not only affect the Thaba Chweu Community but the entire country and world economy.

The South African economy grew by 1,3% in 2017, exceeding National Treasury's expectation of 1,0% growth announced during the National Budget Speech in February. The GDP growth rate is forecasted at 1.5 per cent in 2018, 1.8 per cent in 2019 and 2.1 percent in 2020. Statistics South Africa's December 2017 economic statistics showed an unexpected improvement in the economic outlook, largely as a result of growth in agriculture and mining.

MACROECONOMIC PERFORMANCE AND PROJECTIONS, 2018 - 2021

Fiscal year	2017/18 Estimate	2018/19 Forecast	2019/20 Forecast	2020/21 Forecast
Consumer Price Inflation	5.3%	5.3%	5.4%	5.5%
Real GDP Growth	1.0%	1.5%	1.8%	2.1%

Considering the current performance of the Economic drivers in the Country, Thaba Chweu Local Municipality has analyse the opportunities in Tourism, Mining and Agricultural Sectors as elementary resources to inflate the economy within the surrounding of Thaba Chweu Local Municipality by providing better services to the communities.

The following budget principles and guidelines directly informed the compilation of the 2018/19 MTREF:

- The 2017/18 Adjustments Budget priorities and targets, as well as the base line allocations contained in that Adjustments Budget were adopted as the upper limits for the new baselines for the 2018/9 annual budget;
- Tariff and property rate increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality. In addition, tariffs need to remain or move towards being cost reflective, and should take into account the need to address backlogs;

The following table is an overview of the proposed 2018/19 Medium-term Revenue and Expenditure Framework:

**Table1 Summary Statement of Financial Performance
forecast**

Description	Adjustment Budget 2017/18	Budget Year 2018/19	Budget Year +1 2019/20	Budget Year +2 2020/21
	R'000	R'000	R'000	R'000
Total Revenue (Incl Capital Transfers)	671,552,037	699,330,390	820,032,094	907,057,953
Total Expenditure (Including CAPEX)	682,517,627	698,205,387	738,158,916	770,098,609
Surplus/(Deficit) for the year	(10,965,590)	1,125,003	81,873,178	136,959,344

Total operating revenue increased by 3.5% from the Revised/Adjustment Budget of 2017/18 financial year in comparison to the estimates of 2018/19 Budget year. For the two outer years, operational revenue will increase by 10 and 5 per cent respectively.

Total Operating and Capital expenditure for the 2018/19 financial year has been appropriated at R 698,2 million and translates into a budgeted Surplus of R 1.1 million,. When compared to the 2017/18 Adjustments Budget, operational expenditure has grown by 5.7 per cent in the 2018/19 budget which indicate a massive Increase in certain portion of the expenditure components such as Employee Related Costs, and Electricity Bulk Purchases for the 2018/19 -2020/21 MTREF.

The capital budget of R112.1 million for 2018/19 shows a decrease of 5% when compared to the 2017/18 Adjustment Budget. The capital programme will further decreases to R82.5 million in the 2019/20 financial year and then evens out in 2020/21 to R75.6 million, this massive decrease is experienced from the decline of allocation by National Treasury as indicated in MFMA Circular 91 and the Division of Revenue Bill gazetted in 07th of February 2018.

A substantial portion of the capital budget will be funded from the allocation of the conditional grants over MTREF in addition the balance will be funded from internally generated funds.

1.3 Operating and Capital Revenue Framework

In view of the aforementioned summary, it is important also to enlighten the Council and Management that the 2018/19 Budget was compiled in compliance with the Municipal Standard Charts of Accounts (mSCOA) 6.2 version. Item description and formats of tables will look differently from the customary formats.

It is important to familiarise ourselves with the mSCOA reporting templates, as we anticipate to be fully compliant in 2018/19 Financial Year.

Table 2: Summary of revenue classified by main revenue source

Item Description	Budget Year 2018/19	Budget Year 2019/20	Budget Year 2020/21
Revenue	(699,330,390.00)	(820,032,093.74)	(907,057,952.92)
Discontinued Operations	-	-	-
Exchange Revenue	(340,844,541.00)	(453,580,875.66)	(528,354,123.11)

Agency Services	-	-	-
Interest, Dividend and Sale on Land	(67,986,428.00)	(173,317,510.66)	(197,927,872.11)
Operational Revenue	(271,237.00)	(284,799.00)	(301,887.00)
Rental from Fixed Assets	(1,717,715.00)	(1,803,601.00)	(1,911,816.00)
Sales of Goods and Rendering of Services	(1,048,944.00)	(2,252,813.00)	(1,715,875.00)
Service Charges	(269,820,217.00)	(276,472,152.00)	(327,176,673.00)
Intercompany/Parent-subsiary Transactions	-	-	-
Licences or Permits	-	-	-
Non-exchange Revenue	(358,485,849.00)	(366,451,218.08)	(378,703,829.81)
Fines, Penalties and Forfeits	(1,769,541.00)	(1,858,017.00)	(1,969,499.00)
Licences or Permits	-	-	-
Property Rates	(135,551,308.00)	(144,280,201.08)	(146,980,330.81)
Surcharges and Taxes	-	-	-
Transfers and Subsidies	(221,165,000.00)	(220,313,000.00)	(229,754,000.00)
Interest, Dividend and Rent on Land	-	-	-
Default	-	-	-

The graph below indicates the capability and potential of the Municipality to generate its own income. Total own generated revenue total to R 478.1 million for 2018/19 financial year against the total Budget of R 695, 2 million.

Table 3

The 2018/19 -2020/21 Medium Term Revenue and Expenditure Framework (Budget) Revenue is expected to increase by 3.4% in 2018/19 from the 2017/18 revised budget. In these tough economic times strong revenue management is fundamental to the financial sustainability of every municipality. The reality is that we are faced with development backlogs and poverty. The expenditure required to address these challenges will inevitably always exceed available funding; hence difficult decisions have to be made in relation to tariff increases and balancing expenditures against realistically anticipated revenues.

Service Charges consist of the following

1. Electricity	R 190 933 157
2. Refuse	R 18 411 228
3. Water	R 42 064 604
4. Sewerage	R 18 411 228

TOTAL R 269 820 217

The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macroeconomic policy;
- Growth in the Municipality and continued economic development;
- Efficient revenue management, which aims to ensure at least 95 per cent annual collection rate for property rates and other key service charges;
- Achievement of full cost recovery of specific user charges especially in relation to trading services;
- Determining the tariff escalation rate by establishing/calculating the revenue requirement of each service;
- The municipality's Property Rates Policy approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);

Table below indicate the contributing factors to revenue increment in terms tariff structure-

Table 4: Proposed tariffs

TARIFF DESCRIPTION	2017/18	2018/17	AVERAGE % INCREASE
Electricity	R'0.00		6.84%
Energy rate (c/kwh) 0-50kwh	R 0.85	R 0.91	6.84%
Energy rate (c/kwh) 51-350kwh	R 1.10	R 1.17	6.84%
Energy rate (c/kwh) 351-600kwh	R 1.54	R 1.65	6.84%
Energy rate (c/kwh) >600kwh	R 1.82	R 1.94	6.84%
Water	R9.56	R10.23	7%
Refuse	R99.13	R 106.06	7%
Sewerage	R99.13	R106.06	7%

Assessment Rate	R0.01227	R0.01227	0%
-----------------	----------	----------	----

The table above has reflected domestic tariffs only; the entire tariff listing will be made available for public notes.

Property rate still in 2018/19 will not be increased; increment on the budget is calculated on basis that Municipal Investment Property which was still under Council ownership will be transferred to the rightful owner prior the new financial year. The focus on non-increment of property rates remains to ensure that people of Thaba Chweu Local Municipality continued to receive an affordable rate during this tenure of economic difficulties.

In terms of the price determination for Eskom's tariffs, (NERSA) National Energy Regulator of South Africa has approved a tariff increase of 6.84 per cent for the 2018/19 financial year. The municipality made submission to NERSA regarding increase the electricity tariffs therefore we are still waiting from approval adjustment will be done after the approval is granted.

Proposed water, sewer and refuse tariffs will increased by 7% for 2018/19 approved tariffs were increased by 7 per cent which was little above the inflation rate, Council believes that the proposed rate hikes will not be a huge burden to the community, business and all other stakeholders.

Table 5: grants and subsidies to be transferred to Thaba Chweu Local Municipality in 2018/19

Description	Revised Budget 2017/18	Budget Year 2018/19	Budget Year 2019/20	Budget Year 2020/21
CAPITAL GRANTS				
MIG	R 48 179 000	R 55 457 000	R 47 382 000	R 49 940 000
WSIG	R 45 000 000	R 15 000 000	R 15 000 000	R 15 000 000
INEG	R 13 000 000	R 4 935 000	R 12 800 000	R 4 480 000
EEDG	R 5 000 000	-	-	-
RFMIG	-	R 9 000 000	-	-
Total Capital Grants	R 111 179 000	R 84,392,000	R 75 182 000	R 69 420 000
OPERATIONAL GRANTS				
Equitable Share	R 124 393 000	R 132 627 000	R 142 451 000	R 157 222 000

FMG	R 2 145 000	R 2 215 000	R 2 680 000	R 3 112 000
EPWP	R 1 909 000	R 1 931 000	R 1 931 000	R 1 931 000
Total Operational Grants	R 128 447 000	R 136 773 000	R 147 062 000	R 162 265 000
TOTAL ALLOCATION	R 239 626 000	R 221 165 000	R 222 244 000	R 231 685 000

A total of **R 221.1 million** will be transferred to Thaba Chweu Municipality in the 2018/19 financial year by the National government in the form of Capital and Operational Grants and Subsidies. This is an overall decrease of **R 18.4 million** from the 2017/18 allocation. Hence the equitable share will increase by 6.34 per cent and Municipal Infrastructure Grant by 13.1 per cent. The Municipality is gazetted to receive R15 Million in the (WSIG) Water Services Infrastructure Grant which reflects a **major decrease** of over **R30 million** and **INEG decreases** by over **R 8 million**.

It is anticipated that the cost of providing municipal services will grow at a faster rate than the transfers from national government, as we recognise the high rate on own generated revenue.

1.4 Operating Expenditure Framework

The Municipality's expenditure framework for the 2017/18 budget and MTREF is informed by the following:

- The funding of the budget over the medium-term is informed by the requirements of Section 18 and 19 of the MFMA;
- A balanced budget approach by limiting operating expenditure to the operating revenue;
- The asset renewal strategy and the repairs and maintenance plan;
- Strict adherence to the principle of "no budget allocations without a business plan, procurement plan and cash flow".

The following table is a high level summary of the 2017/18 budget and MTREF (classified per main type of operating expenditure):

Table: 6Summary of operating expenditure by standard classification item

Item Description	Budget Year 2018/19	Budget Year 2019/20	Budget Year 2020/21
Expenditure	586,073,689.29	660,608,666.24	693,417,518.87
Bad Debts Written Off	3,500,000.00	4,000,000.00	4,500,000.00
Bulk Purchases	172,243,340.00	185,809,224.00	195,846,231.00
Contracted Services	78,409,161.00	82,482,257.00	78,161,115.00
Depreciation and Amortization	37,211,000.60	42,317,104.58	44,221,373.80
Employee Related Cost	193,635,745.49	226,812,756.88	244,965,883.25
Interest, Dividends and Rent on Land	10,200,000.00	11,920,000.00	12,400,000.00
Inventory Consumed	7,203,925.00	7,390,208.00	9,033,194.62
Remuneration of Councillors	10,800,955.00	11,088,434.00	12,086,392.00
Operating Leases	3,665,000.00	11,151,500.00	12,977,425.00
Operational Cost	54,972,903.20	61,529,452.00	62,173,772.20

Transfers and Subsidies

14,231,660.00

16,107,729.00

17,052,132.00

Limits were set for the following items amongst others and allocations to these items had to be supported by a list and/or motivation setting out the intention and cost of the expenditure which was used to non-priority expenditures

- Subsistence and travelling allowance
- Furniture and office Equipment
- Refreshments and entertainment
- Fuel
- Advertising and printing

The Municipality encourages business continuity and certain expenditure has to be maintained in line with the inflation rate to enable the institution to continue and provide basic services.

Employee related costs

The 2018/19 budget provides for annual increments, where applicable, and a general increase of 7%. It is a Council's target to restrict personnel costs to below 35% of total expenditure. Personnel costs in the 2018/19 Budget represent **33.9%** of total operating expenditure.

Furthermore it must be noted that a budget of R 2 million has been appropriated for internal EPWP, which translate that 80 job creation will be effected in the year 2018/19 in order to alleviate poverty and unemployment rate.

Remuneration of Councillors

The remuneration of Councillors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in preparing the budget

Debt Impairment

The provision for debt impairment was determined based on a targeted annual collection rate of 85% for 2017/18, 90% for 2018/19 and 96% for 2019/20.

Depreciation and Asset Impairment

The provision for depreciation and asset impairment has been informed by the Municipality's Asset Management Policy and the asset register.

Interest, Dividends and Rent on Land

Consist primarily of the repayment of interest on existing long-term borrowing and Liabilities.

Bulk Electricity Purchases

NERSA has approved a 6.84% increase in the Eskom bulk tariff for the 2018/19 financial year. Energy consumption levels are influenced by the following:

- Significant increases in electricity prices;
- Consumer awareness of the need to conserve energy; and
- The implementation of energy conservation measures.

1.5 Departmental Revenue & Expenditure Summary

Engagements with departments was conducted and the below are the tables illustrating the departmental income and expenditure based on the submissions made by departmental Heads.

**TOTAL CAPITAL
EXPENDITURE**

R112 151 698.36 R83 550 250.49 R76 681 090.54

Roads remain to receive the highest allocation of R49 million in 2018/19 which equates to 44.1 per cent of the total capital budget. Further detail relating to asset classes and proposed capital expenditure is contained in Table A9 (Asset Management). In addition to the MBRR Table A9, MBRR Tables SA34a, b, c provides a detailed breakdown of the capital programme relating to new asset construction, capital asset renewal as well as operational repairs and maintenance by asset class.

1.7 Budget Tables

The following pages present the ten main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's 2018/19 budget and MTREF to be approved by the Council on or before 30th of March. Budget tables and explanatory notes below. (Table 8)

Explanatory notes to MBRR Table A1 - Budget Summary

1. Table A1 is a budget summary and provides a concise overview of the Municipality budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).

2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.

3. Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:

a. The operating surplus/deficit (after Total Expenditure) is positive over the MTREF b. Capital expenditure is balanced by capital funding sources, of which i. Transfers recognised is reflected on the Financial Performance Budget; ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget iii. Internally generated funds are financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow Budget. The fact that the municipality's cash flow remains positive, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.

4. The Cash backing/surplus reconciliation shows that in previous financial years the municipality was not paying much attention to managing this aspect of its finances, and consequently many of its obligations are not cash-backed. This places the municipality in a very vulnerable financial position, as the recent slow-down in revenue collections highlighted. Consequently Council has taken a deliberate decision to ensure adequate cash-backing for all material obligations in accordance with the recently adopted Funding and Reserves Policy. This cannot be achieved in one financial year. But over the MTREF there is progressive improvement in the level of cash-backing of obligations. It is anticipated that the goal of having all obligations cash-back will be achieved by 2018/19, when a small surplus is reflected.

5. Even though the Council is placing great emphasis on securing the financial sustainability of the municipality, this is not being done at the expense of services to the poor. The section of Free Services shows that the amount spent on Free Basic Services and the revenue cost of free services provided by the municipality continues to increase. In addition, the municipality continues to make progress in addressing service delivery backlogs.

Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

- Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile 'whole of government' reports.
- Note the Total Revenue on this table includes capital revenues (Transfers recognized – capital) and so does not balance to the operating revenue shown on Table A4.
- Note that as a general principle the revenues for the Trading Services should exceed their expenditures. The table highlights that this is the case for Electricity, Water and Waste water functions, but not the Waste management function.

4. Functions that show a deficit between revenue and expenditure are being financed from rates revenues and other revenue sources reflected under the Budget and treasury Office.

Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

- Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the Municipality. This means it is possible to present the operating surplus or deficit of a vote. The following table is an analysis of the surplus/deficit for the electricity and water trading services.

Surplus /Deficit by calculation for the trading services

Percentage Surplus	-33%	-21%	2%	-9%	-36%	-36%	12%	16%	16%

- The Electricity trading surplus is accumulative over the 2018/19 MTREF from 11% or 21 million in 2018/19 to 13% in 2020/2021. This is primarily as a result of the high increase in electricity revenue and tariff setting policy of the municipality to buffer the impact of these increases on individual consumers.
- The surplus on the water account remains relatively constant over the MTREF translating into a surplus of 13%, 12% and 30% for each year of the respective financial years.
- The surplus on the waste water account remains relatively constant over the MTREF translating into a surplus of 75%, 66% and 71% for each year of the respective financial years.
- The surplus on the waste account increases over the 2019/2020 translating into a surplus of 12%, 16% and 16% for each year of the respective financial years. The surplus for the outer two years remain the same

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

Revenue by major type

1. Total revenue is R699, 3 million in 2018/19 and escalates to R907, million by 2019/20. This represents a year-on-year increase of over 14 per cent for the 2019/2020 and 10% for the financial year.
2. Revenue to be generated from property rates is R135 million in the 2018/2019 financial year and increases to R 151 million by 2020/2021 which represent 19% of the operating revenue base municipality and therefore remains a significant funding source for the municipality. Tariff increases have been factored in at 7 per cent for each of the respective financial years of the MTREF.
3. Services charges relating to Electricity constitutes the biggest component of the revenue basket of the municipality totalling R190, 9 million for the 2018/19 financial year, for the 2018/19 financial year services charges amount to 267 million, which represent 38.4 per cent of the total revenue base and grows by 2, 22 per cent per annum over the medium-term.
4. The transfers recognised-Operating includes the local government equitable share and other operating grants from national and provincial government .It needs to be noted that in real terms grants receipts from national are growing rapidly over the MTREF by 5% in 2018/2019 , 6 % in 2019/2020 and 9% in 2020/2021

Expenditure by major type

1. The employee's remuneration cost will amount to R193 million in 2018/2019 financial year in the absence of the collective agreement 6, 8 percent for employees related cost and. The remuneration cost to the total operating expenditure budget is 33 per cent. The employees remuneration cost will increase to R211 million in 2019/2020 financial year and the expenditure to the total operating budget will be 33 percent.
2. The bulk purchase expenditure is mainly expenditure for bulk electricity purchase from Eskom and will increase to R172 million due to an average increase of 7, 32 percent granted to Eskom by the National Energy Regulator of South Africa, the increase will come into effect from 01 July 2018 the bulk purchase expenditure make up 29 per cent of the total operating expenditure budget.
3. The depreciation cost will be R37million which makes up 6 percent of the total operating expenditure
4. The cost curtailment measures have been applied in line with the National Government directives on other expenditure. The contracted services and expenditure makes up 24 percent of the total operating expenditure budget.
5. The budget for transfers and subsidies amount to R 14million in 2018/2019 and increased to R 17 million in 2020/2021. The transfers and subsidies will be used to subsidies indigent on free basic services.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source

1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations); capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.
2. The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations. In relation to multi-year appropriations, for 2018/19 allocation total of R112, 1 million is respectively allocated for capital budgets. This allocation is reduced in the two outer year budget.
3. Single -year capital expenditure has been appropriated at R112 million for the 2018/2019 financial year and reduced over the MTREF at levels of R 83million and R76 million respectively for the two outer years.
4. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as the procurement of vehicles and specialized tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the departmental business plans as informed by the IDP and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer-years.
5. The capital programme is funded from capital and provincial grants and transfers, and internally generated funds from current year surpluses.

Explanatory notes to Table A6 - Budgeted Financial Position

- Table A6 is consistent with international standards of good financial management practice, and improves understand ability for councillors and management of the impact of the budget on the statement of financial position (balance sheet).
- This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as "accounting" Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
- Table A6 is supported by an extensive table of notes providing a detailed analysis of the major components of a number of items, including: • Call investments deposits; • Consumer debtors; • Property, plant and equipment; • Trade and other payables; • Provisions non-current; • Changes in net assets; and • Reserves
- The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
- Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end.

Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt.

These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.
2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.
3. The 2018/19 MTREF provide for a further net decrease in cash of R 40 million for the 2018/19 financial year resulting in an overall projected position cash position at year end.
4. As part of the 2017/18 mid-year review and Adjustments Budget this unsustainable cash position had to be addressed as a matter of urgency and various interventions were implemented such as the reduction of expenditure allocations and rationalization of spending priorities.
5. The 2017/18 MTREF has been informed by the planning principle of ensuring adequate cash reserves over the medium-term.
6. Cash and cash equivalents totals R 2.4 million as at the end of 2018/2019 financial year and escalates to R111 million by 2020/2021.

Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

1. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
2. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".
3. Non-compliance with section 18 of the MFMA is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded.
4. From the table it can be seen that for the period of 2018/2019 to 2020/2021 the deficit has been decreased from R 296 to a surplus of R 24 million
5. As part of the budgeting and planning guidelines that informed the compilation of the 2018/19 MTREF the end objective of the medium-term framework was to ensure the budget is funded aligned to section 18 of the MFMA.
6. As can be seen the budget has been modelled on a progressively move from a deficit of R 296 million in 2018/2019 to a surplus of R million by 2020/2021

Explanatory notes to Table A9 - Asset Management

1. Table A9 provides an overview of municipal capital allocations to building new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.
2. National Treasury has recommended that municipalities should allocate at least 40 per cent of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8 per cent of PPE. The municipality meets both these recommendations.

Explanatory notes to Table A10 - Basic Service Delivery Measurement

1. Table A10 provides an overview of service delivery levels, including backlogs (below minimum service level), for each of the main services.
2. The municipality continues to make good progress with the eradication of backlog in the following areas:
 - a. Water services
 - b. Sanitation services
 - c. Electricity services
 - d. Refuse servicesHowever it should be noted that this function is being investigated with a view to realising greater efficiencies, which is likely to translate into a more rapid process to address backlogs.

Part 2 – Supporting Documentation

2.1. Overview of the budget process

Section 53 of the MFMA requires the Mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The Budget Steering Committee consists of the Municipal Manager and senior officials of the municipality.

The primary aim of the Budget Steering Committee is to ensure:

- that the process followed to compile the budget complies with legislation and good budget practices;
- that there is proper alignment between the policy and service delivery priorities set out in the Municipality IDP and the budget, taking into account the need to protect the financial sustainability of municipality;
- that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and
- that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

2.1.1. Budget Process Overview

In terms of section 21 of the MFMA the Mayor is required to table in Council ten months before the start of the new financial year (i.e. in August) a time schedule that sets out the process to revise the IDP and prepare the budget. The Mayor tabled in Council the required the IDP and budget time schedule on 30 August 2017.

2.1.2. IDP and Service Delivery and Budget Implementation Plan

Thaba Chweu Local Municipality IDP is principal strategic planning instrument, which directly guides and informs its planning, budget, management and development actions. This framework is rolled out into objectives, key performance indicators and targets for implementation which directly inform the Service Delivery and Budget Implementation Plan. The Process Plan applicable to the fourth revision cycle included the following key IDP processes and deliverables:

- Registration of community needs;

- Compilation of departmental business plans including key performance indicators and targets;
- Financial planning and budgeting process;
- Public participation process; • Compilation of the SDBIP, and
- The review of the performance management and monitoring processes.

The IDP has been taken into a business and financial planning process leading up to the 2018/19 MTREF, based on the approved 2017/18 MTREF, Mid-year Review and adjustments budget. The business planning process has subsequently been refined in the light of current economic circumstances and the resulting revenue projections.

With the compilation of the 2018/19 MTREF, each department/function had to review the business planning process, including the setting of priorities and targets after reviewing the midyear and third quarter performance against the 2017/18 Departmental Service Delivery and Budget Implementation Plan.

Business planning links back to priority needs and master planning, and essentially informed the detail operating budget appropriations and three-year capital programme.

2.1.3. Financial Modelling and Key Planning Drivers

As part of the compilation of the 2018/19 – 2020/21 MTREF, extensive financial modelling was undertaken to ensure affordability and long-term financial sustainability. The following key factors and planning strategies have informed the compilation of the 2018/19 MTREF:

- Municipality growth • Policy priorities and strategic objectives
- Asset maintenance
- Economic climate and trends (i.e inflation, and household debt)
- Performance trends
- The approved 2017/18 adjustments budget and performance against the SDBIP
- Cash Flow Management Strategy
- Debtor payment level
- The need for tariff increases versus the ability of the community to pay for services;
- Improved and sustainable service delivery

In addition to the above, the strategic guidance given in National Treasury's MFMA Circulars 89 and 91 have been taken into consideration in the planning and prioritisation process.

2.2. Overview of alignment of budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process.

Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political incumbents. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the Municipality, issues of national and provincial importance should be reflected in the IDP of the municipality. A clear understanding of such intent is therefore imperative to ensure that the Municipality strategically complies with the key national and provincial priorities.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the Municipality response to these requirements.

The national and provincial priorities, policies and strategies of importance include amongst others.

- Green Paper on National Strategic Planning of 2009;
- Government Programme of Action; • Development Facilitation Act of 1995;
- Provincial Growth and Development Strategy (GGDS);
- National and Provincial spatial development perspectives;
- Relevant sector plans such as transportation, legislation and policy;
- National Key Performance Indicators (NKPI's)
- Accelerate and Shared Growth Initiative (ASGISA)
- National 2014 Vision;
- National Spatial Development Perspective (NSDP) and
- The National Priority Outcomes.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP.

2.3 Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, the municipality has developed and implemented a performance management system of which system is constantly refined as the integrated planning process unfolds. The Municipality targets, monitors, assess and reviews organizational performance which in turn is directly linked to individual employee's performance.

At any given time within government, information from multiple years is being considered; plans and budgets for next year; implementation for the current year; and reporting on last year's performance. Although performance information is reported publicly during the last stage, the performance information process begins when policies are being developed, and continues through each of the planning, budgeting, implementation and reporting stages. The planning, budgeting and reporting cycle can be graphically illustrated as follows:

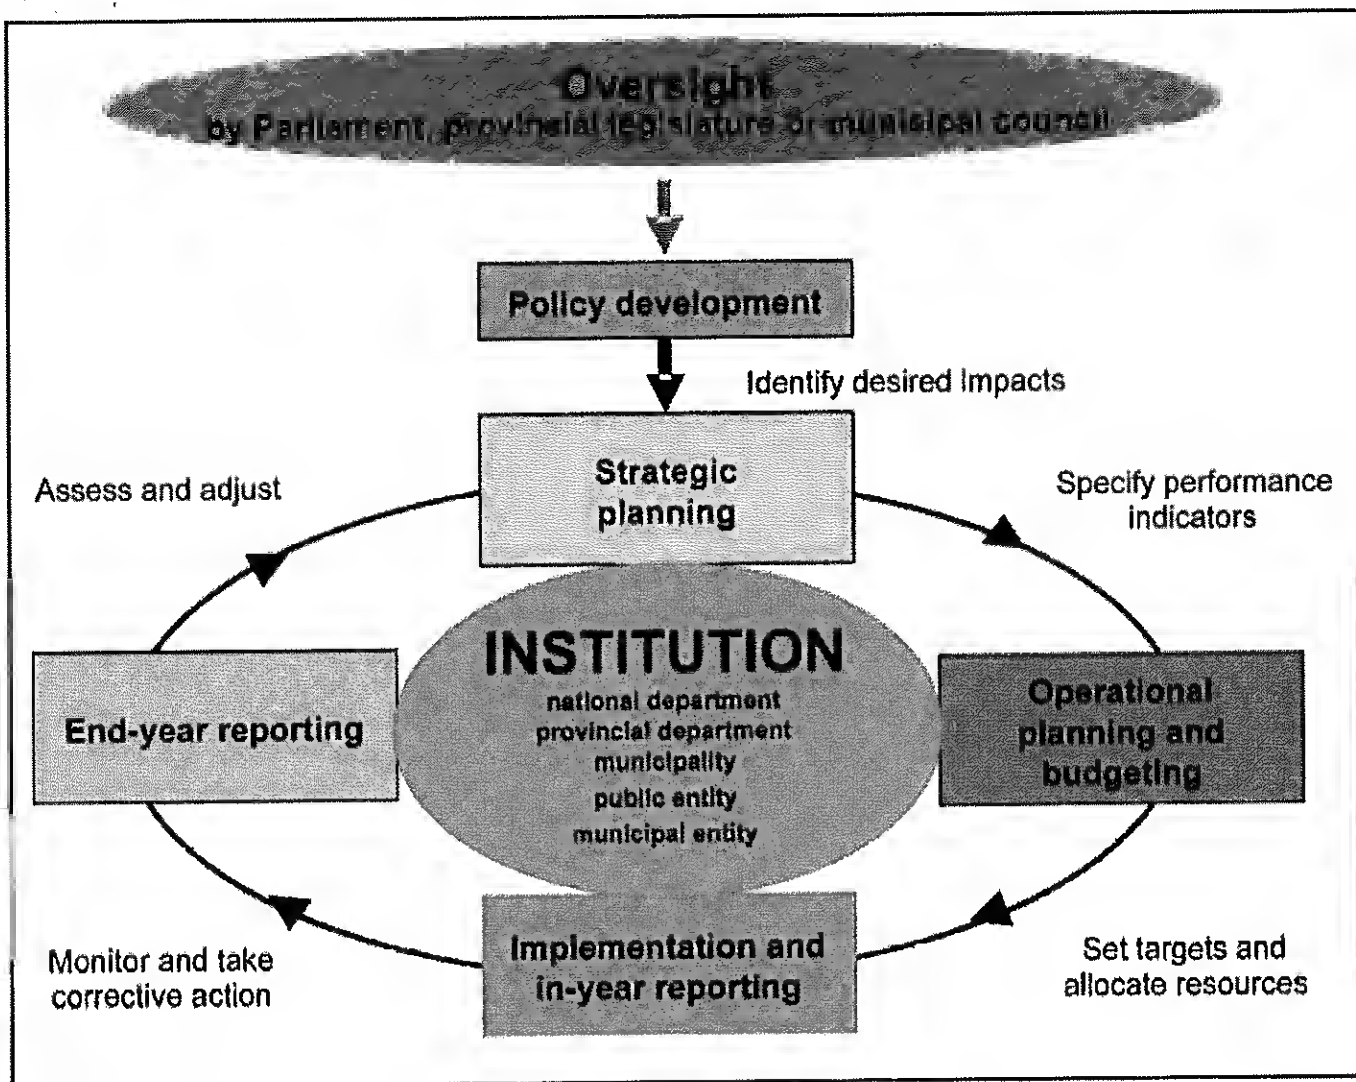

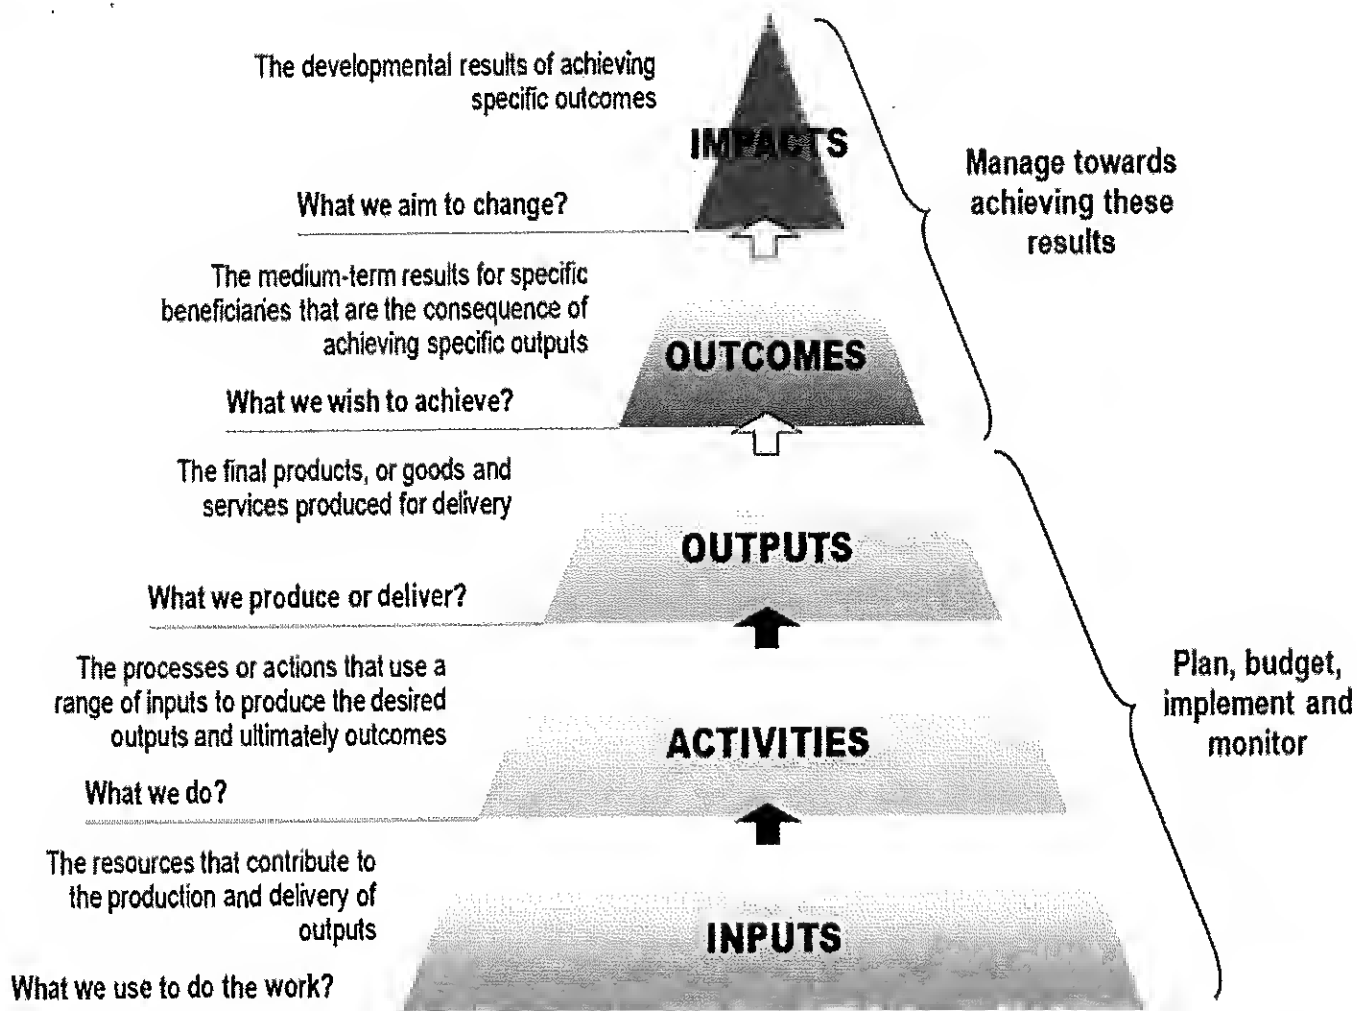

Figure 5 Planning, budgeting and reporting cycle

The performance of the municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations. The municipality therefore has adopted one integrated performance management system which encompasses:

- Planning (setting goals, objectives, targets and benchmarks);
- Monitoring (regular monitoring and checking on the progress against plan);
- Measurement (indicators of success);
- Review (identifying areas requiring change and improvement);
- Reporting (what information, to whom, from whom, how often and for what purpose); and
- Improvement (making changes where necessary).

The performance information concepts used by the municipality in its integrated performance management system are aligned to the Framework of Managing Programme Performance Information issued by the National Treasury:

The following table provides the main measurable performance objectives the municipality undertakes to achieve this financial year

MP321 Thaba Chweu - Supporting Table SA7 Measureable performance objectives

Financial performance indicators and benchmarks

(a) Borrowing management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. As with all other municipalities, the municipality borrowing strategy is primarily informed by the affordability of debt repayments.. The following financial performance indicators have formed part of the compilation of the 2018/2019 MTREF.

Capital charges to operating expenditure are a measure of the cost of borrowing in relation to the operating expenditure. It can be seen that the cost of borrowing is zero decreased significantly due to the fact that there's no borrowing anticipated to fund the 2018/2019 capital expenditure.

In summary, various financial risks could have a negative impact on the future borrowing capacity of the municipality. In particular, the continued ability of the municipality to meet its revenue targets and ensure its forecasted cash flow targets are achieved will be critical in meeting the repayments of the debt service costs. As part of the compilation of the 2018/2019 MTREF the potential of smoothing out the debt profile over the longer term will be investigated.

(b) Safety of Capital

The debt-to-equity ratio is a financial ratio indicating the relative proportion of equity and debt used in financing the municipality's assets. The indicator is based on the total of loans, creditors, and overdraft and tax provisions as a percentage of funds and reserves.

(c) Liquidity

Current ratio is a measure of the current assets divided by the current liabilities and as a benchmark the municipality has set a limit of 1, hence at no point in time should this ratio be less than 1. For the 2018/2019 the MTREF the current ratio is 0,84, in the 2019/2020 financial year it will be 1,09 and 1,44 for 2020/2021 Going forward it will be necessary to maintain these levels or even more.

The liquidity ratio is a measure of the ability of the municipality to utilize cash and cash equivalents to extinguish or retire its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. For the 2017/2018 financial year the ratio was 0.6 and as part of the financial planning strategy it will remain the same throughout the medium term due to the cash flow situation. This needs to be considered a pertinent risk for the municipality as any under collection of revenue will translate into serious financial challenges for the municipality. As part of the longer term financial planning objectives this ratio will have to be set at a minimum of 1.

(d) Revenue Management

As part of the financial sustainability strategy, the municipality will revise its revenue enhancement strategy and theme of the strategy is, "let us make revenue management everyone's business in the municipality" we believe that through the aggressive implementation of the strategy framework, the financial stability in the short-term and sustainability in the long-term will be achieved. The intention of the strategy is to streamline the revenue value chain by ensuring accurate billing, customer service, and credit control and debt collection.

(e) Creditors Management

The municipality has managed to ensure that creditors are settled within the legislated 30 days of invoice. While the liquidity ratio is of concern, by applying daily cash flow management the municipality has managed to ensure a 95 per cent compliance rate to this legislative obligation. This will have at least a favorable impact on suppliers' perceptions of risk of doing business with the municipality, which is expected to benefit the municipality in the form of more competitive pricing of tenders, as suppliers compete for the municipality's business.

2.3.2 Free Basic Services: basic social services package for indigent households

The social package assists residents that have difficulty paying for services and are registered as indigent households in terms of the Indigent Policy of the municipality. With the exception of water, only registered indigents qualify for the free basic services.

For the 2018/2019 financial year 3355 registered indigents will be provided for in the budget. In terms of the municipality's indigent policy registered households are entitled to 10kℓ free water, 50 kwh of electricity, free sanitation, free waste removal equivalent to 85ℓ once a week, free property rates.

Further detail relating to the number of households receiving free basic services, the cost of free basic services, highest level of free basic services as well as the revenue cost associated with the free basic services is contained in Table A10 (Basic Service Delivery Measurement).

Note that the number of households in informal areas that receive free services and the cost of these services (e.g. the provision of water through stand pipes, water tankers, etc.) are not taken into account in the table noted above.

2.3.3 Providing clean water and managing waste water

The Department of Water Affairs conducts an annual performance rating of water treatment works, presenting a Blue Drop or Green Drop award respectively to potable water treatment works and waste water treatment works that meet certain criteria of excellence.

Minimum Green Drop certification standards. This has been prioritized as part of the 2018/2019 medium term capital budget.

2.4. Overview of budget related-policies

The Municipality budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies. These policies are attached in the Budget document as annexures

2.4.1 Review of credit control and debt collection procedures/policies

The Collection Policy as approved by Council in 31 May 2018. While the adopted policy is credible, sustainable, manageable and informed by affordability and value for money there has been a need to review certain components to achieve a higher collection rate. Some of the possible revisions will include the lowering of the credit periods for the down payment of debt. In addition emphasis will be placed on speeding up the indigent registration

Process to ensure that credit control and debt collection efforts are not fruitlessly wasted on these debtors.

As most of the indigents within the municipal area are unable to pay for municipal services because they are unemployed, the Integrated Indigent Exit Programme aims to link the registered indigent households to development, skills and job opportunities. The programme also seeks to ensure that all departments as well as external role players are actively involved in the reduction of the number of registered indigent households.

The 2018/21MTREF has been prepared on the basis of achieving an average debtors' collection rate of 76 per cent on current billings. In addition the collection of debt in excess of 90 days has been prioritised as a pertinent strategy in increasing the municipality cash levels. In addition, the potential of a payment incentive scheme is being investigated and if found to be viable will be incorporated into the policy.

2.4.2 Asset Management Policy

A proxy for asset consumption can be considered the level of depreciation each asset incurs on an annual basis. Preserving the investment in existing infrastructure needs to be considered a significant strategy in ensuring the future sustainability of infrastructure and the municipality's revenue base. Within the framework, the need for asset renewal was considered a priority and hence the capital programme was determined based on renewal of current assets versus new asset construction.

Further, continued improvements in technology generally allow many assets to be renewed at a lesser „real“ cost than the original construction cost. Therefore, it is considered prudent to allow for a slightly lesser continual level of annual renewal than the average annual depreciation. The Asset Management, Infrastructure and Funding Policy is therefore considered a strategic guide in ensuring a sustainable approach to asset renewal, repairs and maintenance and is utilised as a guide to the selection and prioritisation of individual capital projects. In addition the policy prescribes the accounting and administrative policies and procedures relating to property, plant and equipment (fixed assets).

2.4.3 Supply Chain Management Policy

The Supply Chain Management Policy was adopted by Council in May 2018 .

2.4.4 Budget and Virement Policy

The Budget and Virement Policy aims to empower senior managers with an efficient financial and budgetary amendment and control system to ensure optimum service delivery within the legislative framework of the MFMA and the municipality 's system of delegations. The Budget and Virement Policy was approved by Council in may 2018 in respect of both Operating and Capital Budget Fund Transfers.

2.4.5 Cash Management and Investment Policy

The municipality's Cash Management and Investment Policy were amended by Council in January 2011. The aim of the policy is to ensure that the municipality's surplus cash and investments are adequately managed, especially the funds set aside for the cash backing of certain reserves. The policy details the minimum cash and cash equivalents required at any point in time and introduce time frames to achieve certain benchmarks.

2.4.6 Tariff Policies

The municipality's tariff policies provide a broad framework within which the Council can determine fair, transparent and affordable charges that also promote sustainable service delivery. The policies have been approved on various dates and a consolidated tariff policy is envisaged to be compiled for ease of administration and implementation of the next two years.

All the above policies are available on the municipality's website, as well as the following budget related policies:

- Property Rates Policy;
- Funding and Reserves Policy;
- Borrowing Policy;
- Budget Policy; and
- Basic Social Services Package (Indigent Policy).

2.5. Overview of budget assumptions

Prior Years Procurement patterns and Demand study are used as a baseline for raising estimates for all goods and services to be procured. The budget takes into consideration national headline inflation estimates and trends that emerged while implementing the SDBIP in the outgoing financial year.

2.4 OVERVIEW OF BUDGET ASSUMPTIONS

2.5.1 External factors

Unemployment remains very high at 26, 7 percent and escalating according to the latest unemployment statistics released by Statistics South Africa. Economic Growth has remained stagnant at less than 2percent.

According the 2018 National Budget and other sources, the Consumer Price Index (CPI) is projected to be within the upper limits of South African Reserve Bank CPI of 3 – 6 percent band in 2018/2019 financial year. The table below depicts the CPI and economic growth measured in real Gross Domestic Product (GDP) movement over the five (5) periods until 2022/2023 financial year;

2.5.2 Collection rate for revenue services

The estimated payment level trends for the current financial year and the forecast for the next medium-term is as follows;

2.5.3 Growth or decline in tax base of the Municipality

Despite the global economy weaknesses and projected to be likely to remain so for at least a few more year, the South African economic growth outlook in 2016 to 2022 is expected to be as follows;

2.5.4 Salary increases

The employee's remuneration cost will amount to R193 million in 2018/2019 financial year in the absence of the collective agreement 7% percent for employees related cost and 5,3 percent for remuneration of councillors. The remuneration cost to the total operating expenditure budget is **33.9%** per cent. The employees remuneration cost will increase to R226 million in 2019/2020 financial year

2.5.5 Growth or decline in tax base of the municipality

Despite the global economy weaknesses and projected to be likely to remain so for at least a few more year, the South African economic growth outlook in 2016 to 2022 is expected to be as follows;

Headline inflation forecast over the medium-term;

2.5.6 Salary increases

The employee's remuneration cost will amount to R915 million in 2018/2019 financial year in the absence of the collective agreement 6,3 percent for employees related cost and 5,3 percent for remuneration of councillors. The remuneration cost to the total operating expenditure budget is 28 per cent. The employees remuneration cost will increase to R967 million in 2019/2020 financial year and the expenditure to the total operating budget will be 29 percent

2.5.7 Micro or internal environment perspective

Furthermore from macro environment perspective and the unfavourable economic conditions more of our people are unemployed which result in shrinking of the current revenue base, putting pressure on the current municipal revenue and cash flow over the medium-term over the slow economic growth trends reflect that a convergence of unfavourable global and domestic circumstances of which impact negatively on all spheres of government. The revenue base of the municipality is under pressure as no new revenues are derived at the moment due to the slow economic growth and local circumstances.

As a consequence of the distress economy, the municipality was advised by National Treasury to adopt a conservative approach when projecting the revenue and cash flow for the medium term due to unfavourable and unstable economic conditions and rising inflationary pressures, and the slow growth pace on global and national economy.

On the expenditure side - careful analysis and evaluation of the current spending patterns need to be conducted so that the allocation of funds in the next medium-term is in line with the key municipal priorities and non-priority spending is eliminated (austerity measures need to be implemented).

2.5.8 Impact of national, provincial and local policies

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and in this regard various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- (a) Creating jobs;
- ((b) Improving Service delivery;
- (c) Fighting crime and corruption.

2.6. Overview of budget funding

The anticipated increase in revenue from municipal tariffs and improving collection rate, estimated at 70 per cent for the first budget year, justifies the anticipated increase in own revenue. Additional revenue is anticipated from property rates because of the project Municipality is embarking to conduct prior year end 2018 June of transferring properties from Municipality to its rightful owner as per Audit finding of 2016/17 Year. Only gazetted grants and transfers from national government, totalling R 221 million, were factored into the funding envelope. This is to ensure that the budget is based on realistically anticipated revenue.

2.7. Expenditure on allocations and grant programmes

Specific purpose transfers received by the municipality are allocated to capital projects implemented by the municipality in accordance with grant conditions. The other grants, including LGES, FMG and EPWP are allocated to operational programmes, such as the provision of free basic services, and operating costs.

2.8. Allocations of grants made by the municipality

The municipality makes will transfers in the form of subsidy to its entity.

2.9. Councillors and board member allowances and employee benefits

Employees costs of councillors and officials are budgeted for at a global increase of 6,4 per cent as confirmed increment rates are not yet available. This is based on a weighting of headline inflation estimates

and indications from negotiations going on at the bargaining chamber. The actual increment is 7 per cent but on SA22 which includes budgeted vacant positions.

2.10 Monthly targets for revenue, expenditure and cash flow

The monthly targets on revenue, expenditure and cash flow it illustrate how much will be the monthly bill, monthly payments to creditors and also the cash that will be received by the municipality.

2.10. Contracts having future budgetary implications

In terms of the Municipality Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial comments from the Financial Management Division of the Treasury Department

2.11. Capital Expenditure details

The following three tables present details of the municipality capital expenditure programme, firstly on new assets, then the renewal of assets and finally on the repair and maintenance of assets.
